

Torchcraft Creative Server Resource Pack and optifine install instructions

Current Server is running:
1.20.2

Server address is
torchcraft.potatosalad.party

Official Resource Pack is an edited version of [Conquest 1.20.2](#)

Password for it is "Poopy12345!" with no quotes

Installing optifine:

[Download Optifine 1.20.2](#)

to install, create a 1.20.2 install on the minecraft launcher.
then run the .jar to install optifine, your launcher should default to an orange OF

For linux install, make sure you run your apt updates for Java.
you can install Java by typing:

```
sudo apt install default-jre
```

then, open a terminal where optifine is located, run this command in to install.

```
java -jar <thenameofthefile>.jar
```

your launcher should default to an orange "OF"

Shaderpacks

You are free to install whatever shaderpacks you like. Personal favorites are

[Sildur's Vibrant Shaders](#)

[Complimentary Reimagined](#)
